COMMUNITY HOMELESSNESS REPORT SUMMARY

(Halton Region)

2022-2023

The Community Homelessness Report (CHR) is an annual Reaching Home reporting deliverable that supports communities to prevent and reduce homelessness using a more coordinated, systems-based and data-driven response. The CHR was designed to support local discussions and decision making, using all of the information about homelessness currently available at the community level. Communities are encouraged to use their CHR data to develop clear plans of action that help them to reach their homelessness reduction targets and to leverage the collective efforts of service providers working across the community, regardless of how they are funded.

This is a summary of the CHR for the 2022-23 reporting cycle. It shows the community's self-assessment of Reaching Home implementation, which includes the following key components:

- meaningful collaboration between Indigenous and non-Indigenous partners (see Section 1);
- community-level governance, coordinated service delivery (Coordinated Access) and use of a Homelessness Management Information System or HMIS (see Section 2); and,
- an outcomes-based approach (tracking community-level outcomes and progress against targets using a Unique

dentifier or By-Name List, referred to as a List; see Section 3).

If the community was able to report on outcomes and targets, this CHR Summary also includes results for each of the five core outcomes of Reaching Home (see Section 4).

Section 1. Community Context – Collaboration between Indigenous and Non-In-	digenous	Partners
Does your community, as a Designated Community (DC), also receive Reaching Home Indigenous Homelessness (IH) funding?	No – o	only DC funding is available
Specific to Coordinated Access and the HMIS, has there been ongoing, meaningful collaboration the DC or Territorial Homelessness (TH) CE and local Indigenous organizations over the reportin		Yes
Describe this collaboration in more detail.		
Halton Region has consulted with local Indigenous organizations in regards to Halton's work arou Coordinated Access. Halton Region relies on these partnerships to support the overall implement Coordinated Access system. Both non-Indigenous groups and Indigenous groups have the opport through the Community Advisory Board. In 2023 Halton Region will continue to work alongside the to further relationship building and engagement in the community with Indigenous groups. As not currently no Indigenous social services agencies providing services in Halton Region and we would assistance for funding to take this next step in Indigenous reconciliation.	tation and rtunity to co ne Regiona red elsewho	structure of Halton's ontribute to the CHR Il Indigenous Advisor ere, there are

With respect to the completion of the Community Homelessness Report (CHR), was there ongoing, meaningful collaboration between local Indigenous and non-Indigenous organizations and, where No applicable, the IH CE and/or IH CAB? What is the plan to ensure meaningful collaboration occurs during next year's CHR process? Local organizations, including Halton's CAB indirectly influence this report in a variety of ways. By-Name List data is made publicly available to these platforms where the opportunity for feedback and discussion in encouraged. Halton's CAB is informed on service gaps and aware of the overall goal to achieve reductions in both chronic and overall homelessness. Halton's CAB works tirelessly toward new solutions in Halton Region, including advocacy efforts for increased funding. Halton's CAB is aware of the federal reporting requirements and do have the opportunity to provide input through the table. Halton Region currently does not have an Indigenous nonprofit organization in Halton. We welcome investment in this area so that we have an organization to collaborate with on Indigenous issues. When the investment comes, we will be ready to collaborate given our exhaustive work to date studying the issue of Indigenous homelessness.

Section 2. Coordinated Access and Homelessness Management Information System (HMIS) Self-Assessment

Summary Tables

The table below provides a summary of the work your community has done so far to meet the Reaching Home minimum requirements for Coordinated Access and an HMIS.

	Met	Started	Not Yet Started
Number of minimum requirements	18	0	0

The table below shows the percentage of minimum requirements completed for each core Coordinated Access component.

Governance	HMIS	Access Points to Service	Triage and Assessment	Coordinated Access Resource Inventory	Vacancy Matching and Referral
100%	100%	100%	100%	100%	100%

Summary Comment

Are there particular efforts and/or issues that you would like to highlight for this reporting period related to your community's work to achieve the Reaching Home minimum requirements?

Halton Region has entered into a Data Sharing Agreement (DSA) with INFC. Halton Region met with the HIFIS Support Desk to set up data extractions tools, and initial data was submitted in March 2023.

Section 3. Outcomes-Based Approach Self-Assessment

Summary Tables - Minimum Requirement

The tables below provide a summary of the work your community has done so far to transition to an outcomes-based approach under Reaching Home.

Step 1:	Step 2:	Step 3:
Has a List	Has a real-time List	Has a comprehensive List
Yes	Yes	Yes

Step 4: Can report <u>monthly</u> outcomes and set targets using data from the List (reporting in Section 4 is mandatory for 2023-24 CHRs, if not earlier)			
List was in place as of January 1, 2023 (or earlier)	Can generate monthly data	Has set targets	Has an outcomes-based approach in place

Yes	Outcome 3: Yes	Outcome 3: Yes	Yes
	Outcome 4: Yes	Outcome 4: Yes	
	Outcome 5: Yes	Outcome 5: Yes	

Summary Comment

Are there particular efforts and/or issues that you would like to highlight for this reporting period related to your community's work to transition to an outcomes-based approach under Reaching Home?

Over the past year Halton Region has been scaling it's HMIS to generate a By-Name List without extracting data that requires manual manipulation in Excel. Work is well underway to track all critical elements of a By-Name List, including the ability to generate monthly and annual data reporting. Halton expects to have this new approach implemented by the next CHR reporting cycle.

Halton's By-Name List is highly utilized for both service planning at the person level, and strategic planning at the system level. Halton Region is using the By-Name List daily to support service plans for individuals and families experiencing homelessness. The By-Name List is heavily relied upon to effectively support clients to appropriate housing and to provide the right level of support to clients while they are homeless. On a system level, Halton Region has been able to extract data from the By-Name List to share with the Community Advisory Board, as a means of reporting back on how Halton is doing by capturing system level data on homelessness in Halton Region. Sharing of this data has been able to support local agencies, to identify gaps in services and direct funding appropriately. Early By-Name List data has been provided the context to Halton around service gaps and where additional efforts and funding resources may be required.

During this CHR reporting cycle By-Name List data was utilized by Org Code Consulting for their report on Shelter, Supports and Supportive Housing, where a review of the current supportive housing options in Halton Region has taken place. The By-Name List has helped to inform this report, including where gaps in service are apparent. With this data, Org Code has provided a report which adressses where the gaps in service are and recommendations for improvement and capacity building moving forward.

More information	More information about the Unique Identifier List			
	Step 1. Have a List			
Where does data for the List come from?	? - HIFIS			
	□ Excel			
	Other HMIS			
	□ Other data source(s)			
	□ Not applicable – Do not have a List yet			

Step 1. Have a List (cont.)

For the List, does the community have...

A written policy/protocol that describes how interaction with the homeless- serving system is documented	Yes
A written policy/protocol that describes how housing history is documented	Yes

Cilionic nomelessiless				
х	Federal definition			
	Local definition			

From the List, can the community get data for...

Newly identified on the List	Yes
Activity and inactivity	Yes
Housing history	Yes

From the List, can the community get demographic data for...

<u> </u>			
Age	Yes	Indigenous identity	Yes
Household type	Yes	Veteran status	Yes
Gender identity	Yes		

Step 2. Have a real-time List				
How often is information about people experiencing homelessness updated on the List? Daily				
Is people's interaction with the homeless-serving system (activity and inactivity) updated regularly on the List?	Yes			
Is housing history updated regularly on the List?	Yes			
Is there a process in place for keeping chronic homelessness status on the List up-to-date?	Yes			

	Step 3. Have a comprehensive List										
	Ooes the community have a document that identifies and describes all of the service providers at help people experiencing homelessness with their housing challenges?										
	estion: How does data from the List compare to other community-level data source is is an optional follow-up question for communities that have completed the "Undersneet.										
Co	ommunity did not complete this optional question.										

Step 4. Track outcomes and progress against targets using data from the List					
Does the List meet the benchmark of a "Quality By-Name List" confirmed by the Canadian Alliance to End Homelessness?	Yes				

Section 4. Community-Level Outcomes and Targets – Monthly

Outcome #1: Fewer people experience homelessness (homelessness is reduced overall)

	March 2020	March 2021	March 2022	March 2023	March 2024	March 2025	March 2026	March 2027	March 2028	Target
People who experienced homelessness for at least one day (that month)			113	138						186

Context fo	or Outcome #1 (monthly):	
•	Please provide context about your results, as applicable.	
	Slight increase shown, however not a significant difference. Between March 2022 and March 2023 saw an increase to the number of people experiencing homelessness for at least one day that mapproximately 2 additional people each month. As is evident across the Country, population grow and temporary residents have vastly exceed supply of rental housing which has created a less the in Halton. Funding for new assisted and supportive housing in our Region has not kept pace with unless this changes, homelessness will continue to grow. Coordinated Access relies on rental housing and Halton Region cannot do it alone.	onth by vth from newcomers an 1% vacancy rate the demand and
,	Was the federal standard for calculating this outcome used (see Annex A)?	Yes

Outcome #2: Fewer people were newly identified (new inflows to homelessness are reduced)

	March 2020	March 2021	March 2022	March 2023	March 2024	March 2025	March 2026	March 2027	March 2028	Target
People who were newly identified (that month)			28	25						40

-	or Outcome #2 (monthly):	
	Please provide context about your results, as applicable.	
	Slight decrease shown this year, however not a significant difference. The updated target provide market forces as per CMHC.	ed takes into account

Outcome #3: Fewer people return to homelessness (returns to homelessness are reduced)

	March 2020	March 2021	March 2022	March 2023	March 2024	March 2025	March 2026	March 2027	March 2028	Target
Returns to homelessness (that month)			0	1						0

ntext for Outcome #3 (monthly):	
Please provide context about your results, as applicable.	
Slight increase shown, however not a significant difference. Halton Region hopes to ensure housi suitable for all individuals in order to reduce the number of people returning to homelessness on a Case management and other supports are provided by Halton Region's Reaching Home funded a reduce re-entry. Recidivism is largely in Halton's control and should be responsible as such for rearea.	a monthly basis. agencies in order to
Was the federal standard for calculating this outcome used (see Annex A)?	Yes

Outcome #4: Fewer Indigenous peoples experience homelessness (Indigenous homelessness is reduced)

	March 2020	March 2021	March 2022	March 2023	March 2024	March 2025	March 2026	March 2027	March 2028	Target
Indigenous peoples who experienced homelessness for at least one day (that month)			5	0						0

for Outcome #4 (monthly):	
Please provide context about your results, as applicable.	
Slight decrease shown, however not a significant difference. Work to determine an accurate base peoples experiencing homelessness is still underway and subject to change. One month of data relevant indicator of a sociodemographic group.	
Was the federal standard for calculating this outcome used (see Annex A)?	Yes

Outcome #5: Fewer people experience chronic homelessness (chronic homelessness is reduced)

	March 2020	March 2021	March 2022	March 2023	March 2024	March 2025	March 2026	March 2027	March 2028	Target
People who experienced chronic homelessness for at least one day (that month)			14	16						8

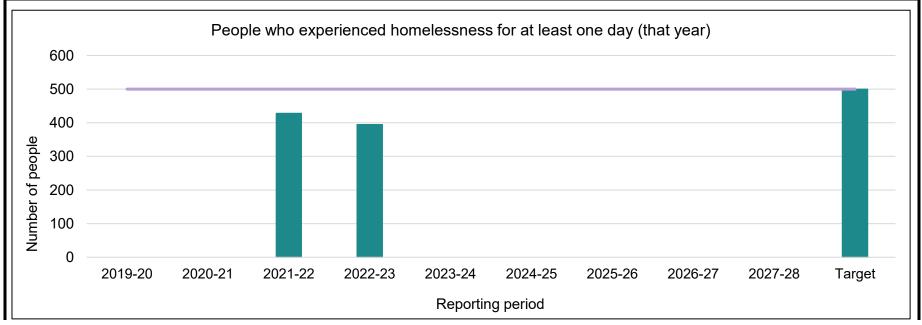

or Outcome #5 (monthly):	
Please provide context about your results, as applicable.	
Halton Region hopes to drive reductions in chronic homelessness. While our Coordinated Access accountable for this work, market forces means households across the country are staying longe fewer exit options. This is outside our control as per CMHC. Work to determine an accurate bas experiencing chronic homelessness is still underway and subject to change.	r in shelter with
Was the federal standard for calculating this outcome used (see Annex A)?	Yes

Section 4. Community-Level Outcomes and Targets – Annual

Outcome #1: Fewer people experience homelessness (homelessness is reduced overall)

	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25	2025-26	2026-27	2027-28	Target
People who experienced homelessness for at least one day (that year)			428	395						500

for Outcome #1 (annual):	
Please provide context about your results, as applicable.	
Halton's Coordinated Access system continues to be a leader in the country and housing low and indiduals experiencing homelessness. The vast increase in mental health and addictions issues funding for supports or housing, as well as the market conditions explained CLEARLY by CMHC homelessness unlikely without significant net new investment in Halton.	without requisiite
Was the federal standard for calculating this outcome used (see Annex A)?	Yes

Outcome #2: Fewer people were newly identified (new inflows to homelessness are reduced)

	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25	2025-26	2026-27	2027-28	Target
People who were newly identified (that year)			286	298						350

Please provide context about your results, as applicable.	
Slight increase shown this year, however not a significant difference. The updated target provide market forces as per CMHC.	ed takes into accour
Was the federal standard for calculating this outcome used (see Annex A)?	Yes

Outcome #3: Fewer people return to homelessness (returns to homelessness are reduced)

	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25	2025-26	2026-27	2027-28	Target
Returns to homelessness (that year)			88	47						47

Please provide context about your results, as applicable. Moderate decrease shown in this data set, however more monitoring is required to determine an appropriate baseline. Was the federal standard for calculating this outcome used (see Annex A)? Ye	or Outcome #3 (annual):
